Disaster Response Project – Client Meeting [Week 5]

Date: 2025-09-29

Time: 11:30 – 12:30

Attendees: Ivo, Faezeh, Sepideh, Furqan, Ben

Agenda

- Follow-up from last meeting
  - Presentation of the Impact Map (delayed deliverable from last week)
- Review of Deliverables for this week
  - Domain Stories and User Story Map for the first features
  - Prioritized Quality Attribute Scenarios and Fitness Functions
  - Identified Architectural Concerns and Constraints
- Client Feedback & Clarifications
  - Validation of Domain Stories
  - Feedback on User Story Map
  - Agreement on Quality Attribute priorities and Fitness Functions
  - Confirmation of Concerns and Constraints
- Questions from the Team
  1. Should citizens be able to register an incident directly in the system, or should all reports only come through 112?
  2. Are hospitals considered first responders or secondary responders? In large-scale disasters, are they expected to establish temporary camps near the disaster site?
  3. Do you expect us to use a relational database or a NoSQL database for this project?
  4. Are we allowed to use cloud services in the solution, or should the system only be deployed on-premise?
